Letter of Support

Dear Dr. Hildebrand,

I am writing to formally express our strong interest in participating as an external partner in the Correlyze project. Our company greatly values the productive and longstanding relationship we have shared with Lucid Concepts AG, and we are enthusiastic about the opportunity to extend this successful collaboration to the Correlyze initiative.

Over the years, our partnership has consistently demonstrated the strength of our cooperation and mutual commitment to advancing scientific research. From our initial joint projects to our most recent endeavors, we have achieved significant advancements and impactful results together. This solid foundation of trust and shared success makes us confident in the future of our continued collaboration.

Our company has an established reputation in the micro-CT field, where we have pioneered advanced imaging technologies that continue to push the boundaries of research and application. The Correlyze project, with its focus on multi-modal and correlative imaging, aligns perfectly with our expertise and interests. We are eager to contribute our extensive experience in the micro-CT domain to help drive the project's success.

We firmly believe that our involvement as an external partner will provide valuable insights and technological capabilities that will support and enhance the project's objectives.

Furthermore, we recognize multiple business opportunities with the Correlyze system, particularly in integrating SCANCO's advanced image analysis tool, IPL, into the system. The Correlyze architecture will enable seamless integration of IPL into workflows, facilitating the gathering of quantitative results for correlative analysis, both in micro-CT studies and in multi-modal studies involving other imaging devices.

As an external partner, SCANCO will have the opportunity to retail the Correlyze system alongside our devices, benefiting from a significant margin on the software sales price. Additionally, offering support for correlative studies through Correlyze will provide a marketing advantage to customers with multi-modal setups involving devices from other manufacturers.

Thank you for considering our intent to join the Correlyze project as an external partner. We are confident that our combined efforts will lead to significant advancements in multi-modal and correlative imaging.

With best regards,

Bruno Koller
CEO, SCANCO Medical AG
