**Letter of Intent to participate as external partner in Correlyze**

Dear Tor,

I hereby confirm my intent to participate as external partner in your Correlyze project should it get funded and agree with being listed as such in the project proposal. In that role, I would be willing to serve on the project's advisory board, share reusable workflows with the project consortium and collaborate on new workflows.

In my research group's previous collaboration with your company, we successfully addressed the problem of processing terabyte-scale image datasets. In our current research, we have the additional challenge of correlating even larger sized images from in vivo and ex vivo synchrotron radiation-based micro computed tomography. We do not have a solution for this yet, and your project promises to deliver what we need.

I am looking forward to collaborating with Lucid Concepts and its partners on this important project.

Best regards,

A handwritten signature in blue ink, appearing to read 'V. Kurtcuoglu', with a horizontal line underneath.
